6. Procedure and Expected Result

Create the form, add the thirteen fields with the specified link names, arrange them into four sections, configure validations, then create the list report. A valid booking submission should create a record visible in Room_Booking_Report.

Completion/evidence status: The supplied screenshot demonstrates the booking form preview. The report screenshot is empty, so the required three submitted sample records and successful validation tests are not evidenced here. Do not treat those checks as completed until verified in Zoho Creator.
