LAB ASSIGNMENT 2 — ADVANCED FIELDS

Hotel Room Booking Form (Advanced) | Assignment 03

Student	Sam Devaraja J.
Register Number	240701463
Department	Computer Science and Engineering
Platform	Zoho Creator

1. Aim

To extend the existing Room_Booking_Form with all seventeen Advanced Field types for room inventory lookup, group bookings, payment calculation, media capture and booking confirmation.

2. Required Supporting Form

Main form: **Room_Booking_Form**
Supporting inventory form: **Room_Inventory**
Booking report: **Room_Booking_Report**

3. Seventeen Advanced Fields

• Decision Box — Requires_Airport_Pickup

• Rich Text — Hotel_Policies_Display

• URL — Travel_Itinerary_URL

• Image — Guest_Photo

• Percent — Loyalty_Discount_Percent

• Currency — Advance_Payment_Paid

• Decimal — Distance_From_Airport_KM

• Date-Time — Booking_Submitted_On

• SubForm — Additional_Guests_Details

• Lookup — Room_Type_Availability_Lookup

• Signature — Guest_Digital_Signature

• File Upload — ID_Proof_Upload

• Audio — Special_Request_Voice_Note

• Video — Celebration_Request_Video

• Auto Number — Booking_ID

• Formula — Total_Amount_Payable

• QR/Barcode — Booking_Confirmation_QR_Code

4. Key Configuration

• Lookup connects to Room_Inventory and retrieves room type, tariff and availability.

• Additional_Guests_Details allows 0–5 rows.

• ID proof accepts PDF/JPG/PNG up to 5 MB; guest photo accepts JPG/PNG up to 2 MB.

• Celebration video maximum: 45 seconds and 50 MB; voice note is optional.

• Loyalty discount range: 0–20%; advance payment is non-negative and formatted in INR.

• Total_Amount_Payable is read-only and uses room tariff × nights × (1 – discount) – advance payment.

• Booking_ID uses HTL-BKG-, current year and a six-digit sequence; QR code encodes Booking_ID.

• Booking_Submitted_On is automatically captured; pickup decision and digital signature are mandatory.

5. Procedure and Expected Result

Extend the same booking form, create and populate the Room_Inventory master form, configure the lookup, subform, file restrictions, calculation, booking ID and QR code. Submit test bookings and verify the generated values in the booking report.

Completion/evidence status: Screenshots show the extended booking form and the Room Inventory form/report. They do not show two submitted booking records with generated Booking_ID and QR code, a working lookup selection, or the computed balance test. Those outcomes remain to be verified.

Screenshot Evidence

Figure 1. Booking form preview showing basic and advanced fields, including payment, lookup, media and generated-value fields.

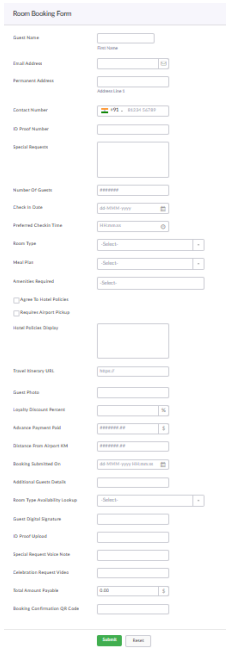

Figure 2. Room Inventory form with room code, room type, tariff, availability, room number, floor, occupancy, amenities and maintenance notes.

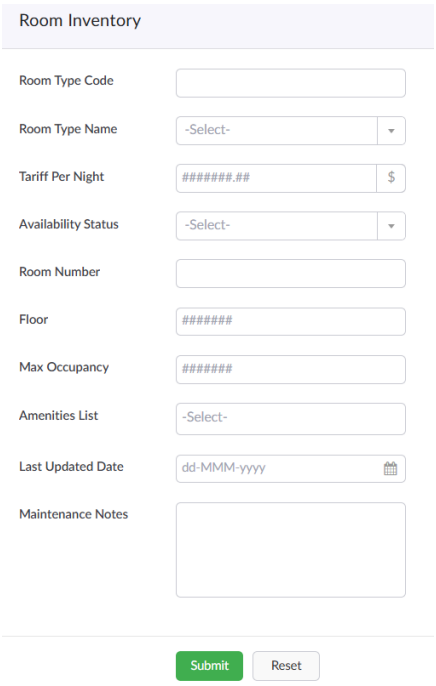

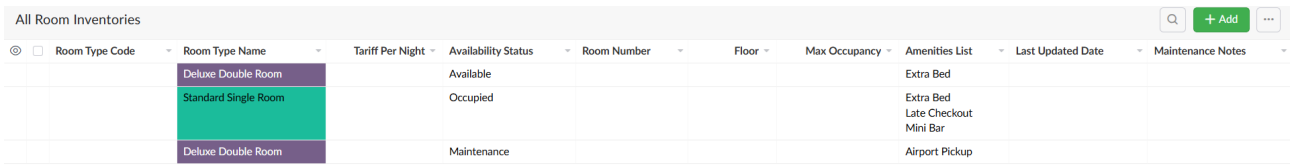

Figure 3. All Room Inventories report showing sample room types and availability statuses.

Room Type Code	Room Type Name	Tariff Per Night	Availability Status	Room Number	Floor	Max Occupancy	Amenities List	Last Updated Date	Maintenance Notes
	Deluxe Double Room		Available				Extra Bed		
	Standard Single Room		Occupied				Extra Bed Late Checkout Mini Bar		
	Deluxe Double Room		Maintenance				Airport Pickup
