LAB ASSIGNMENT 4 — REPORT TYPES

Hotel Room Booking Reports Suite | Assignment 03

Student	Sam Devaraja J.
Register Number	240701463
Department	Computer Science and Engineering
Platform	Zoho Creator

1. Aim

To create nine report views from Room_Booking_Form so front-office, housekeeping, marketing and management can review booking data in different formats.

2. Required Base Form

Room_Booking_Form

3. Nine Required Reports

• List View — All_Bookings_List: guest, contact, room type, check-in date and booking status; ascending check-in date.

• Spreadsheet View — Bookings_Spreadsheet: editable check-in, check-out and housekeeping status; grouped by room type.

• Kanban View — Booking_Status_Kanban: grouped by Enquiry, Confirmed, Checked-In and Checked-Out.

• Calendar View — Checkin_Schedule_Calendar: based on Check_In_Date.

• Map View — Guest_Origin_Map: based on geocoded Permanent_Address.

• Timeline View — Booking_Activity_Timeline: based on Booking_Submitted_On or Check_In_Date, grouped by week.

• Pivot Table — RoomType_By_MealPlan_Pivot: Room_Type rows, Meal_Plan columns, booking count values; blanks as zero.

• Chart View — RoomType_Popularity_Chart: bar chart of booking count by Room_Type.

• Summary View — Guest_Stay_Summary: grouped by Guest_Name; booking count and sum of Number_Of_Guests.

4. Configuration and Procedure

Create each view from the same booking form. Apply the specified sorting, grouping, editable columns, date basis, geocoding, aggregation and chart configuration. Test each report with sample booking data and verify the report-type selector.

5. Expected Result

The nine reports provide list, spreadsheet, Kanban, calendar, map, timeline, pivot, chart and summary perspectives over the same booking records.

Completion/evidence status: The screenshots show an empty booking report and a populated room-inventory report. They do not demonstrate the nine required report views or their interactions. Add the nine report screenshots and at least one drill-down or Kanban before/after test to complete the evidence.

Screenshot Evidence

Figure 1. Room Booking Form Report currently displays no records. This is evidence of the report view, but not of the nine configured report types.

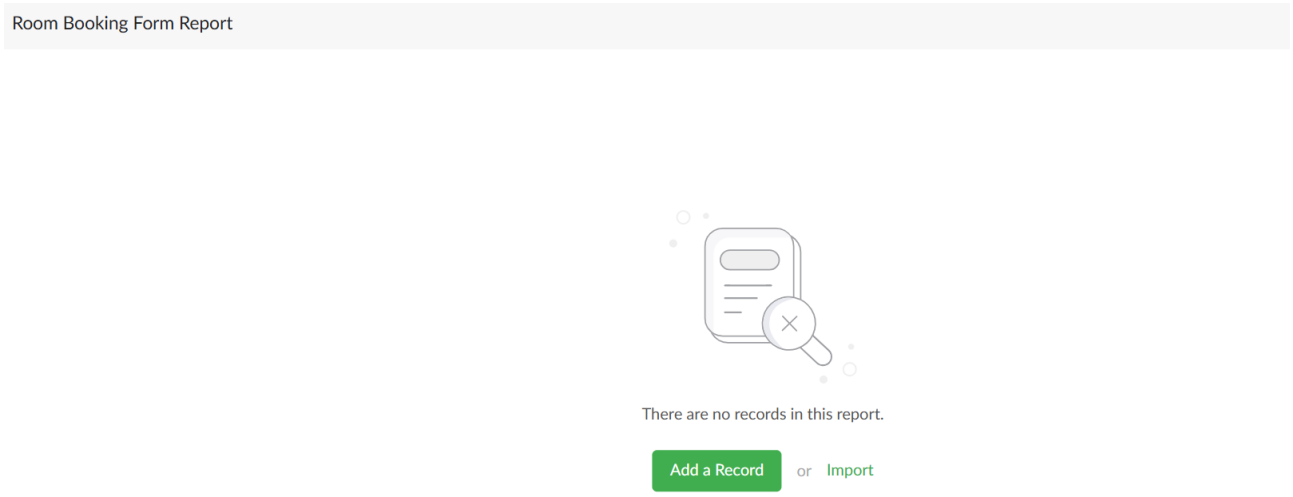

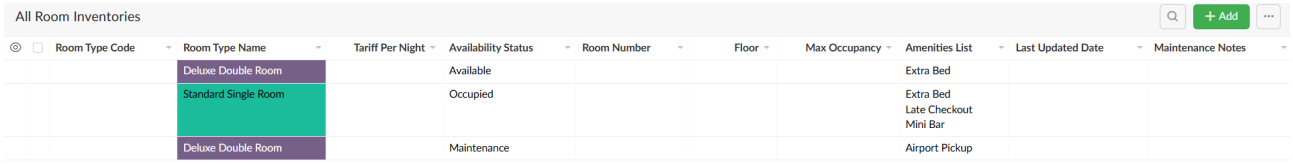

Figure 2. All Room Inventories report showing inventory records. This is a supporting inventory report, not one of the nine booking reports.

Room Type Code	Room Type Name	Tariff Per Night	Availability Status	Room Number	Floor	Max Occupancy	Amenities List	Last Updated Date	Maintenance Notes
	Deluxe Double Room		Available				Extra Bed		
	Standard Single Room		Occupied				Extra Bed Late Checkout Mini Bar		
	Deluxe Double Room		Maintenance				Airport Pickup
